PROFILE

Experienced frontend developer with a proven track record of building high-performance web applications using **React, Tailwind, Styled-Components, Bootstrap, JavaScript, HTML and CSS.** Passionate about crafting intuitive user experiences that drive business growth. Skilled in optimizing website speed, improving accessibility, and collaborating effectively in agile development environments. Demonstrated ability to manage multiple projects while delivering high-quality results.

PROFESSIONAL EXPERIENCE

2024 - present

Enoch Louis Coding Bootcamp, Instructor

- Leadership: Exhibit effective leadership skills to facilitate an ongoing learning environment.
- Classroom Management: Demonstrated strong classroom management skills, creating a positive and disciplined learning environment conducive to effective learning.
- Curriculum Development: Design and adapt lesson plans to meet the diverse needs of learners, ensuring all students succeed.
- Effective Communication: Collaborate openly with students, parents, and colleagues. Collaborated with colleagues to develop cross-curricular projects, promoting critical thinking and teamwork skills amongst students.

Key Achievement

- Actively participated in meetings, professional development workshops, and parent-teachear conferences, contributing to the school community and students success.

2022 - 2023

Readems, Fullstack Developer

Readems is a was a startup company that gives writers the opportunity to monetize their work and I was in charge of leading the development team to achieve the company's tasks and goals.

- Collaborated closely with design and content teams to translate creative concepts into user-friendly interfaces.
- Designed and develop the company's web pages from scratch, creating a user-centric experience using React, Styled-Components, Framer-motion and state management tools like Redux
- Implementing responsive design techniques to optimize the website for various devices and screen sizes.

Key Achievement

- Through market research, user testing, collaborating with the founding team, I contributed to developing several key landing pages for targeted marketing campaigns, designed to attract specific customer segments and crafting a launch-ready experience.

2022 - 2022

Unbird, Front-End Developer

- Design and develope the company's settings page from scratch, creating a user-centric experience using React, Styled-Components and Framer-motion.
- Collaborated with back-end team to integrate RESTful APIs
- Collaborated closely with design and content teams to translate creative concepts into user-friendly interfaces.
- Applied creative problem-solving skills to address challenges in the development process, resulting in streamlined workflows and improved project timelines.

Key Achievement

- I was in charge of making use of Figma design to create a fully functional, ease of use and responsive web pages from scratch to finish **resulting in overall operational efficiency and system performance.**
